

2017: Healthcare at the Crossroads

Healthcare in America is at a critical crossroads under the Trump Administration. We need to protect, improve, and expand on the healthcare gains we have made. But we can't stop there. We must finish the job and ensure that everyone has the healthcare they need.

Labor United for Universal Healthcare and Campaign for a Healthy California are hosting a workshop on the current state of healthcare in America (including the new campaign here in California to win guaranteed healthcare for all) and a speakers training on advocating for single payer universal healthcare. Please join us for one or both events!
